

PIINKBOX

Pitch-Deck

"A content sharing platform powered by Web3 unlocks the true potential of digital creativity, enabling creators to own, control and monetize their content in a decentralized and trusting manner."

Our Purpose

Piinkbox aims to create a secure environment for both content creators and their followers. Our objective is to offer fair compensation to creators without imposing exorbitant fees on them. Additionally, we plan to incentivize promotion of our platform by providing an exclusive referral commission. Piinkbox will also provide unique features not found on competing websites, such as the option for creators to conduct live sessions and receive payment from their fans.

Industry Problems

- Excessive fees
- Restricted features
- Lack of transparency
- Payment issues
- No anonymity

“

"Find your perfect
partner or just
explore your desires.
**with consenting
adults"**

PiinkBox

Our Solutions

- Charge per call/text
- Stream live to fans and charge for access
- Receive tips
- Referral revenue to get residual income
- Share all other platforms on profiles
- Create wishlists
- Starting payout of 92% of revenue

Our Timing

The content creator industry boasts a remarkable annual worth of \$200 billion, which is steadily increasing. However, existing platforms in the market impose high fees and provide limited features for creators. There is a clear opportunity for a platform that offers comprehensive features and provides generous payout ratios to creators. Moreover, anonymity is currently not an option, but having a platform akin to OnlyFans where fans can purchase content anonymously creates a new market segment.

Investor Opportunity

- Low tax 0% Buy 3% Sell
- Deflationary Supply
- Weekly competitions from treasury pool
- 5% Revenue from referred creators
- USDT Bi weekly residual income from the platform
- Audited Contract
- Utility built so marketing funds go to marketing
- Backed by some of the best marketing firms
- Knowledgeable and professional team
- Product that is adoptable and the best in its industry

User Reach

Planned analysis for PiinkBox

Heavy Social Marketing

Presale funds and taxes will allow constant gorilla marketing tactics to be implemented for both the token and utility. This will consist mainly from social networks such as Twitter, Instagram, Tiktok and Facebook.

Marketing Fund Allocation

Below is the planned initial distribution of funds for marketing. TikTok will be added after 4 weeks when we have built established presence on the 3 main platforms.

40%

Our Advantages

As with any business, there is competition. It's important to remember that sex sells, and it always will. Our platform will be the pioneer in providing a means for creators and fans to earn residual income through referral commissions based on creators' revenue. This makes it highly profitable for members to bring in more users to the platform. In addition, we offer the most competitive payout rates to creators. We have also introduced features that combine webcam and content creation, expanding the market for even greater adoption.

Above all competition
